Experience

Lab Project:

During 3rd Year, a real estate website was developed using basic react features and bootstrap in a form of group assignment. the purpose of the website was it was user-friendly and would meet the basic requirement necessary when searching for a property.

Presentations:

In the final year, multiple presentations were conducted:
- A presentation was conducted on how a workplace environment effects the employee along with it's pros and cons.
- The Final Year Project demo was held in which the faculty team as well as externals were present and the project was demonstrated.
